

# DEXIKON

*DEXIKON* is #5 in the E•G•G Series and is a battle of linguistic dexterity where players assemble words to expand their deck of letter cards. Players begin with a small deck of versatile letter cards, and use these to spell words, score points, and buy additional letter cards.

More expensive letter cards are less versatile, but they are worth more points and have increasingly powerful bonus effects when played - including messing with other players.

Instead of spending points to buy new cards, points from words can be 'banked' and once a certain number of words have been banked, each player gets one last chance to spell a word using their entire deck. The player with the most points wins.
