- Easy-to-learn rules
- Strategic card game with many paths to victory
- Exercises planning, & reasoning skills and flexible thinking

Railways of the World: The Card Game™ is a fast paced card game adaptation of the highly popular *Railways of the World* board game series.

Players use track cards and city cards to build a series of railroad routes and deliver goods. As the game progresses, players work to connect more cities, upgrade their engines for larger carrying capacity and deliver goods through a network of routes.

Railways of the World: The Card Game™ provides two versions of rules: one the whole family can play, which is also a great way to introduce them to the *Railways of the World* game, and one for more experienced fans of the series.

If you can handle some luck-of-the-draw and enjoy the social experience of games like Ticket to Ride, then this is definitely worth checking out! It's a solid card game with a lot of potential that uses cards in new and creative ways, and has enough decision making packed into a relatively short playing time. Recommended. ~ Ender Wiggins on BGG.com

"Railways of the World: The Card Game does an excellent job of adapting the gameplay of Railways/Steam to the medium of cards. The result is an interesting card game full of tough decisions and different paths to victory."

~ Shannon Appleline on RPG.net
