

Rococo

Welcome to the *Rococo* Era during the reign of Louis XV, when holding lavish balls is quite trendy. Important personalities wrap up in noble coats and dresses, anxious to outshine one another. With the biggest event coming up in a few weeks, everyone is turning to you with their requests: an elegant coat, a stunning dress, or a donation to fund the fireworks. Soon you realize that it's not just about your dressmaking business anymore – it's about managing the most prestigious ball of the era...and now it's time to (roc)k!

Rococo is a Euro-style game with an interesting take on deck building. Each turn you play one employee card to perform a task: hire a new employee, buy resources, create a coat or dress, or invest in the ball's musicians, fireworks and decorations. Not every employee is up to every task, so you must choose wisely – especially since each employee grants a unique bonus including generating prestige points. The game ends with the big ball and a final scoring and the most prestige points wins.

Review Excerpt from John Zaenglein
I really like this game. It wasn't hard to teach, or hard for the players to grasp once we got started. There are definitely a lot of decisions you need to make in this game, and it really pushes you to try to be as efficient as possible. This is such a good euro that I would put it next to my other favorites like Caverna, Puerto Rico, and Keyflower. My family enjoyed it very much and so did I. I highly recommend it to anyone. It gets the full five star treatment from me.
