

TRIASSIC TERROR

www.eagle-gryphon.com

Triassic Terror is an exciting tactical game for 2 to 6 players. Starting with just one herd in the steamy Triassic Swamp, players must make wise choices to grow new herds and guide their migration across the four pre-historic landscapes. This Primeval world is full of danger, with the mighty T-Rex, marauding Velociraptors and swooping Pterodactyls looking to reduce the size of your herds. Jurassic and Cretaceous Volcanoes fill this violent world with ash and dust and devastate the terrain. The player best managing his herds and dominating not only local habitats, but entire environments, will win this challenging game.
